Hindi (Conversational)

About Me:

Full Stack Developer and Android Developer with hands-on experience shipping production-ready web and mobile applications. Proficient in React.js, Node.js, Django, Kotlin (Jetpack Compose), and Firebase. Proven ability to integrate AI/ML capabilities — from YOLO/Roboflow object detection to Gemini API generative AI — into real-world apps. Currently interning at MindMatrix building GenAI-powered Android apps.

PROJECTS:

Airbnb Clone- Full Stack Web Application

April 2026

Tech Stack: React · Node.js · Express · MongoDB · Tailwind CSS · JWT · REST API

- Built a full-stack property rental web app with React frontend, Node.js/Express backend, JWT-based authentication, property CRUD, favourites, and dynamic booking with price calculation.
- Engineered 10+ RESTful API endpoints with JSON handling, token-protected routes, and MongoDB data models with relational population via Mongoose ODM; version-controlled on GitHub.

CapsiGuard – Disease Recognition System

Feb 2025 – Jan 2026

Tech Stack: Python · Django · YOLO · Roboflow · OpenCV · Deep Learning · REST API

- Built an AI-powered chilli crop disease detection web app using Django and Roboflow's object detection API, with real-time inference, annotated bounding box overlays via OpenCV, and confidence scoring for multiple diseases.
- Engineered a full-stack pipeline with a custom-trained CV model, glassmorphism-styled frontend featuring drag-and-drop upload, live disease classification, and treatment recommendations, backed by secure authentication, RESTful APIs, and automated media management.

RecipeBook – Full Stack Web Application

Oct 2024 – Dec 2024

Tech stack: Django · Python · MySQL · HTML · CSS · JavaScript · REST API · Git

- Developed a full-stack recipe sharing platform with Python/Django backend, multi-mode filtering via ORM Q-objects, and RESTful views with JSON responses; used SQL (MySQL) for structured data storage.
- Built social features (ratings, comments, user profiles), admin dashboard with full CRUD, ownership-based access control, user authentication, and image uploads; maintained full GitHub version history.

INTERNSHIP:

MindMatrix

Feb 2026 – May 2026

Android App Development using GenAI

- Built KarunadaKala — a full-featured Android app (Kotlin + Jetpack Compose) to discover Karnataka's art forms and artisans — integrating Firebase Auth, Firestore, Google Maps SDK, Gemini API for AI-generated descriptions, and 3-role RBAC (Explorer/Artisan/Admin).
- Designed and built the front-end prototype of TaskFlow, a Smart Task Management application, implementing multi-screen navigation, adaptive layouts, Material Design 3 theming, and scalable project architecture using Jetpack Compose.
